Countries with universities with the most available information

University homepage (English version) is a global source of public information on the achievements of the university and its capabilities, about the quality and level of education, research and communication.

Subject of the ranking - availability of information on the homepage of the university on Internet.

Areas of investigation - availability of information within the divisions:

- General information, university description – 12 indicators;
- Campuses - amenities and capabilities – 6 indicators;
- Information for university community – 8 indicators;
- Academic information (learning) - 8 indicators;
- Academic information (research) - 7 indicators;
- Communication possibilities - 8 indicators.

Indicators and their average values were determined as a result of a survey conducted by experts.

Experts - Members of the International Council of Scientists - university professors from 38 countries.

Rating for each country is determined as an average value of the BC-index of the university homepages, which are presented in RankPro.

Below the ratings for all components of the BC-Index are shown.
