

RankPro 2018/2019
TOP World leading universities
Region: Asia-Pacific
TOP 100

According to the methodology, the rating of an institution of higher education consists of three components, which would allow obtaining a full picture of the level of the institution:

- Academic possibilities of a university - academic ranking;
- Communicability and information availability on a University homepage – ranking by BC-Index;
- National and international reputation of the university – public ranking.

Experts: members of the International Council of Scientists ICS.

The interrelation of these three rating components in the overall result is determined as a result of a survey conducted among members of the International Council of Scientists ICS - professors of universities of different types from more than 40 countries.

As a result of the survey between the members of the International Council of Scientists, conducted under the GWC program to compile RankPro 2018/2019, the following values of the contribution of each component in the overall ranking of a university have been obtained:

- Academic ranking – 50%
- Ranking by BC-Index – 25%
- Public ranking – 25%

The top leading universities of the world were defined as a general result of adding the contribution of each component of the rating under the GWC program.
